

INO-Charge

Connect - Turn on the Switch - Charge You small electric vehicle

INO-Charge is a Reduction socket, which creates a classic AC 230V from an AC charging station for electric vehicles.

Benefit:

- Easier charging of e-scooter, e-bike, e-moped and e-scooter anywhere on the road where an AC charging point for electric cars is available.
- Simple operation (just insert and the switch).
- Compatible with all AC chargers for electric cars (public or Wallbox).
